PROFESSIONAL SUMMARY

Full-stack software developer with 5+ years of experience designing and deploying scalable web applications, APIs, and automation solutions. Proficient in React, Vue, Firebase, Node.js, and SQL. Adept at translating business requirements into efficient systems that enhance data integrity, streamline workflows, and improve performance in Agile environments.

PROFESSIONAL EXPERIENCE

Software Developer — Seedware LLC (Remote) | Feb 2020 – Aug 2025

- Developed multiple new data entry forms within the logistics inventory management platform for seed businesses, streamlining customer data, orders, and shipments across multiple regions.
 - Developed a custom scheduling and automation app for client updates, reducing manual scheduling time by 90%.
 - Created REST APIs to integrate external client data with internal systems, improving data accuracy and eliminating hours of manual entry.
 - Revamped the company's outdated main dashboard into a modern, responsive interface with real-time data visualizations and dynamic graphs powered by complex datasets.
 - Modified every application file and input field to support multilingual functionality (including full French localization), improving accessibility for international users.
 - Designed and implemented a custom content management system (CMS) within the Seedware platform, allowing clients to build and manage their own web pages and training programs.
 - Integrated third-party Twilio APIs to enable drivers to send real-time text updates on shipment processing and deliveries.
 - Collaborated with QA teams to identify, prioritize, and resolve critical bugs, ensuring high product stability and user satisfaction.
 - Worked closely with a 5-person Agile development team to plan, develop, and deliver bi-weekly feature releases on schedule.
 - Diagnosed and resolved complex technical issues unique to the agriculture industry, providing scalable and sustainable long-term solutions.
-

PROJECTS

Rivals Sportsbook — *Peer-to-Peer Sports Betting Platform*

Built a web platform that enables users to bet against friends or other players globally, eliminating traditional sportsbooks. Developed a full-featured admin dashboard to monitor analytics, transactions, users, and active bets. **Tech Stack:** React, Firebase, Stripe, PayPal, Node.js

Maxout Pro — *All-in-One Fitness Tracking App*

Developed a comprehensive mobile fitness app for tracking workouts, goals, routines, advanced statistics, and personal records. Integrated RevenueCat for subscription management and in-app purchases. **Tech Stack:** React Native, Firebase, RevenueCat

Viewpoints — *Community Activity & Event Discovery App*

Created a mobile app that lets users see what's happening nearby in real time — from gyms and parks to sports events and malls. Displays crowd activity, live posts, and alerts when friends are at a location. **Tech Stack:** React Native, Firebase, Supabase

EDUCATION

B.S. in Computer Science — Winona State University | Aug 2015

TECHNICAL SKILLS

Frontend: React (5 yrs), Vue.js (6 yrs), JavaScript (6 yrs), HTML5 (6 yrs), CSS3 (6 yrs), Tailwind CSS

Backend: Node.js (5 yrs), PHP (6 yrs), Firebase Cloud Functions (5 yrs), RESTful APIs

Database: SQL (6 yrs), Firebase (6 yrs)

Tools & Workflow: Git, GitHub, Postman
